CS-465 Mod 5 Milestone 2

Travlr Getaways Class Diagram

The flowchart outlines a web application's structure, detailing the client's interaction with the server via HTTP and the server's connection to MongoDB for data management.

The diagram illustrates the flow from user login on the client side to data retrieval from MongoDB on the server, culminating in the HTTP delivery of content.

Travlr Getaways Class Diagram

The class diagram details user progression from standard accounts to advanced roles, like travel agents, who interact with itinerary elements, with data from various travel services consolidated within TravellerInfo for display on the website.

API Endpoints: Exposing RESTFul endpoints is a design approach to enable an application to participate in a larger ecosystem. In the API Endpoints table provided in the SDD, document each endpoint including the HTTP method, purpose, URL, and any relevant notes.
